Michigan Fishing Report

July 15th, 2010

Regular rains are keeping the PM in good shape.

Pere Marquette

Water Conditions - rising

After a few days of very warm weather and water temps in the upper 60s last week, things are back to normal. Regular rains have kept the PM in good shape. Big yellow streamers and mice after dark have been the most productive way to catch big trout. With the lamprey weir shut down this year we're seeing a lot more salmon and lake run browns in the upper river already. Should be a good salmon season. *Matt Dunn*

Manistee

Water Conditions - about average

Early salmon arrived last week in fishable numbers. Hopper fishing is just getting going.

Muskegon

Water Conditions - about average

Trout fishing has fallen off with the warm temperatures. Smallmouth fishing is good. *Phil Cusey*

Beaver Island

The guys are still catching carp pushing that magical 40 pound mark. Smallmouth fishing has also been very good with 5-6lb fish caught regularly. We think the next state record smallmouth will come from Beaver Island. *Kevin Morlock*
